

TIM Alum's Medical Center Dream for West Maui Becomes a Reality

For many years now West Maui residents and visitors would have to travel miles to get emergency medical assistance and at times would have to deal with road closures along the way. But now with the continued efforts of the West Maui Improvement Foundation President, Joseph Pluta ('74 TIM grad), the WMIF Board of Directors, and the community's support, the development of the West Maui Hospital and Medical Center has finally been approved!

For over 10 years, Joe Pluta has been pushing to build an around the clock emergency medical center in West Maui to help the many West Maui residents and visitors. It has been reported that during a critical medical accident (ex: head injury) if a person does not obtain medical attention within the first hour of the accident the chances of experiencing complications and damage to the body is greater. Therefore with the development of this medical center the West Maui community will be just steps away from getting the best medical attention without having to travel very far.

It is truly extraordinary people like Joe that helps bring a community together. Congratulations Joe on this great milestone for Maui!
